CableClam Installation Instructions
PN 1001100 / 1002100 / 1003100

1. **Determine if pre-drilled rubber seal offers tight fit on cable.**

2. **Drill a hole in the seal that ensures a tight fit with the cable.**

3. **Slit the seal from its edge to the drilled hole.**

4. **Fasten the deck ring and gasket to the surface.**

5. **Pass the cable end through the stainless steel cap.**

6. **Slip the compression ring onto the cable. Insert the cable through the slit of the seal. Press the seal into the compression ring.**

7. **Screw the compression ring to the deck ring by tightening each screw a few turns at a time. Do not overtighten the screws.**

8. **Press the stainless steel cap over the assembly.**
